ReSPARK

Export Agent.

Your trade paperwork, read and filed. The Export Agent reads the booking confirmations, letters of credit, charter terms and freight invoices in your inbox. It fills in your contracts, bookings and voyages, checks the documents against each other, and drafts what goes back out. Your team approves.

READS DOCUMENTS LIKE

- Booking confirmations
- L/C advices
- CP recaps
- B/L drafts
- SOF & NOR
- Draft surveys
- Freight invoices
- KYC packs

WHY IT MATTERS

One cargo can generate dozens of documents from carriers, owners, banks and surveyors, each in its own format. Someone reads every one, retypes it into the right order or booking, and checks freight invoices against the contract by hand. It's slow, it's where errors start, and it keeps traders from trading.

BUILT FOR

Traders and export coordinators
Approve values instead of retyping them.

Freight and finance
Invoices checked against the contract before anyone pays them.

SALES@RESPARK.COM

Everything your desk needs to stop retyping

Read
40+ trade document types from email or upload. One scanned pack is split into its separate documents.

Match
Links each document to the right sales order, booking, voyage or letter of credit.

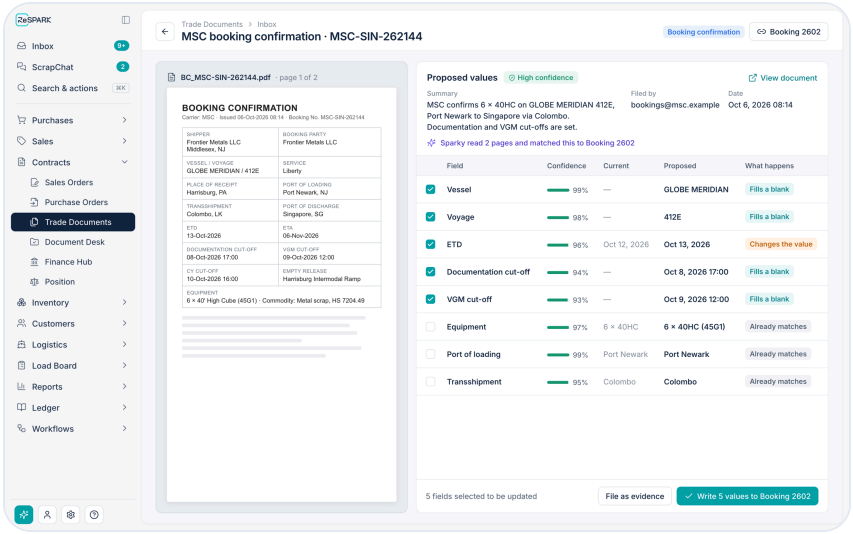

Review
Approve, correct or exclude each value, with the source text one hover away.

Check
Freight invoices against the contracted rate, and laytime claims against the statement of facts.

Draft
Recaps, shipping instructions, nominations, laytime settlements and debit notes from the record.

Ask Sparky
See what needs attention and apply documents from chat. Every change waits for approval.

See it in action

A BOOKING CONFIRMATION, READ AND MATCHED TO ITS BOOKING

Your team stays in control

- ✓ Nothing is saved without a person's approval
- ✓ Every action logged with the approver's name
- ✓ Agents respect each user's permissions
- ✓ Learns from every correction, with no retraining
- ✓ Works in ReSpark Trade, alongside your ERP and accounting
- ✓ Optional add-on: Trade runs fully without it

40+ TRADE DOCUMENT TYPES READ BY AI

Let your desk approve, not retype.
