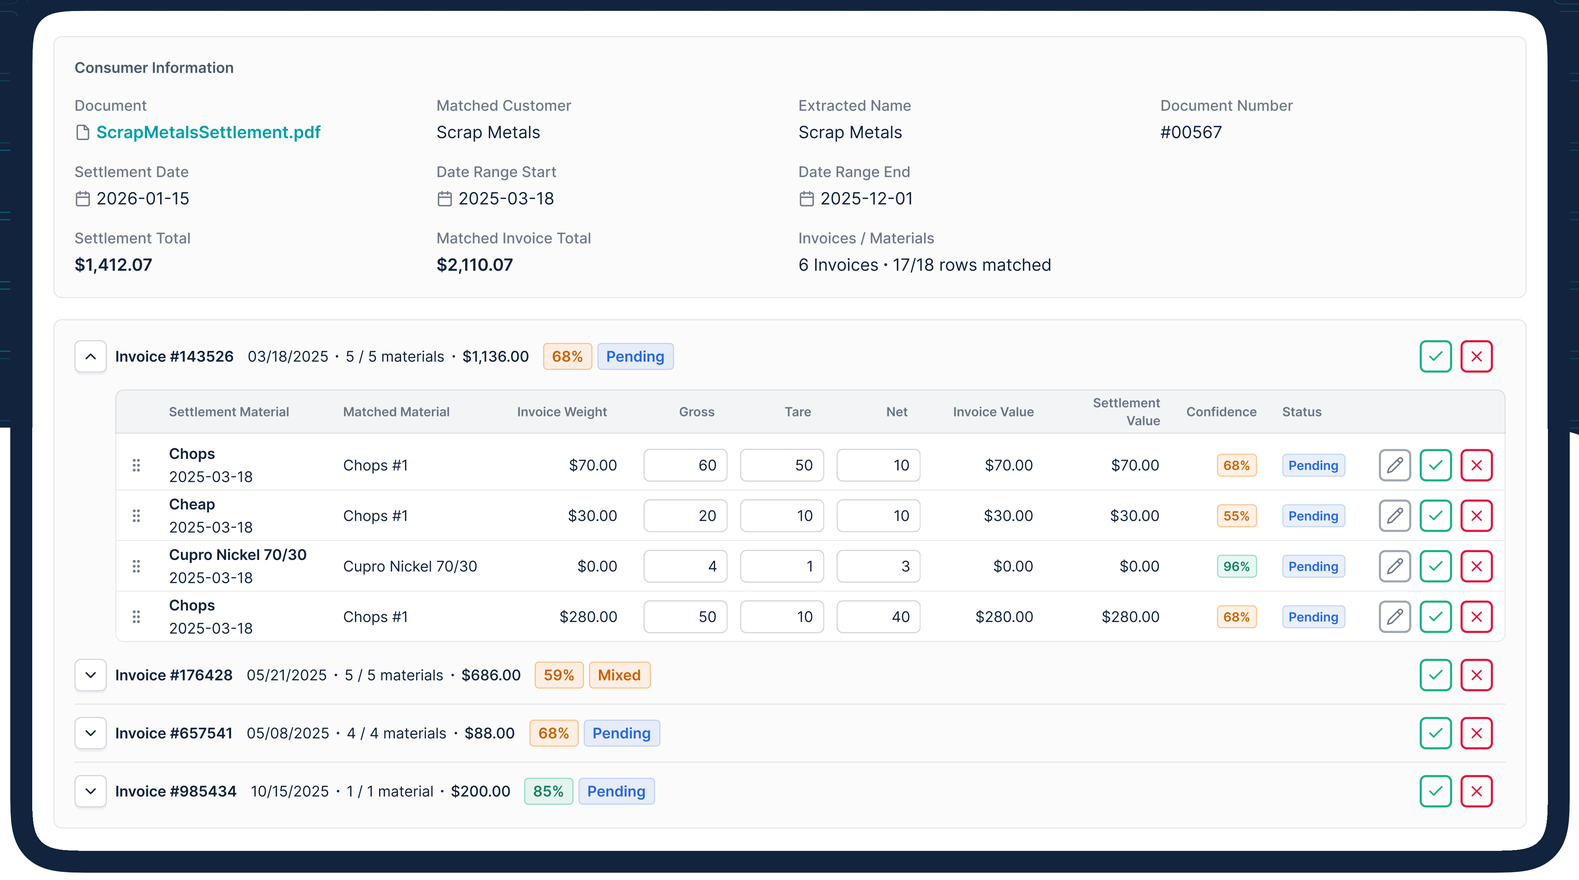
ReSPARK

AI AGENT · FINANCE

Close the month 4x faster.



REQUIRES YARD OPERATIONS PRO

Settlements, invoicing, reconciliation.

Touchscreen-first ticketing, integrated hardware, a mobile operator app, and in-workflow compliance. The foundation every yard needs before layering on commercial, financial, or logistics modules.

4x
faster month-end close

75%
faster close, reported by customer

ReSpark Capabilities

** Available capabilities are based on your licensed ReSpark modules.

Consumer settlement reconciliation

Pulls remittance and settlement documents directly from email and auto-matches them against open invoices. Auto-proposes consumer weight adjustments line by line.

Multi-invoice remittances

For check or wire remittances covering multiple invoices, the agent aggregates invoices for single-click approval. Mill settlements processed in any format — PDF, spreadsheet, or scanned image.

Freight invoice reconciliation

Upload a carrier invoice and the agent auto-reconciles it against freight bills accrued from linked dispatch and scale tickets. Surfaces loads you don't have AP tickets for — and carrier-claimed loads you didn't actually move.

Shared invoice-matching engine

Consumer-weight reconciliation and payment application run on the same engine. Freight carrier matching lives in the same place.

Customer portal traversal (roadmap)

For consumers who post settlements to their own portals (Sims, DJ, etc.), autonomous agents log in, pull down documents, and feed the same reconciliation pipeline.
