ReSPARK

SALES@RESPARK.COM

Embedded Finance.

An embedded general ledger and AI Finance Agent built directly into ReSpark. Transactions flow automatically from scale ticket to close, while AI handles consumer settlement reconciliation—**no exports, no duplicate systems.**

Embedded General Ledger

Chart of accounts, AP/AR, financial statements, and multi-entity support live natively inside ReSpark — not in a separate accounting app.

Automated Journal Entries

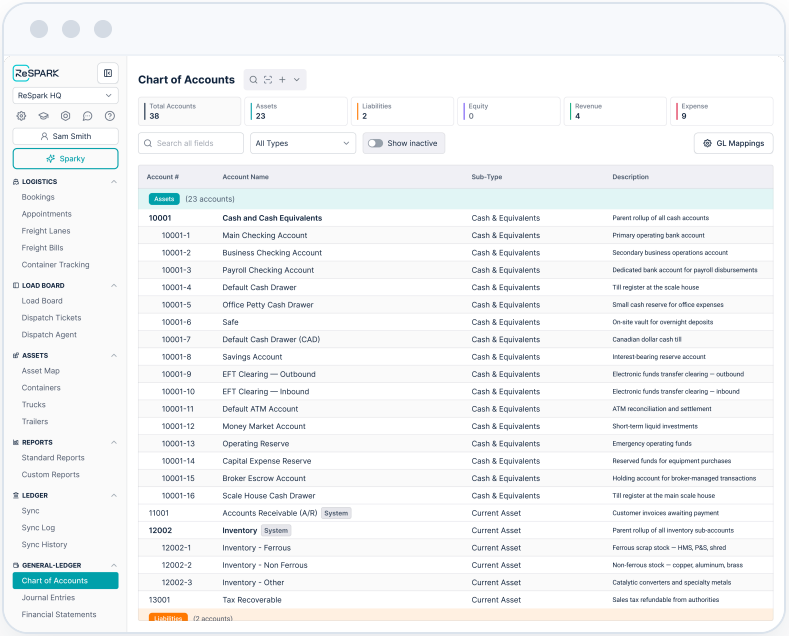
Tickets, inventory moves, purchases, sales, and settlements post to your books the moment they happen — with revenue, expense, and tax mapping.

AI Finance Agent

Upload a consumer settlement and the agent extracts line items, then proposes invoice matches on dates, materials, weights, and customer — with confidence scores.

You Stay in Control

The agent flags variances, quality deductions, and freight adjustments and shows its work — but never moves money or posts without your approval.



One system for tickets, inventory, sales, settlements, accounting, and AI-powered financial workflows.

Features

- ✓ Chart of accounts management
- ✓ Automated journal entries
- ✓ Accounts payable & receivable tracking
- ✓ Financial statements & reporting
- ✓ Revenue, expense & tax mapping
- ✓ Multi-entity support · PDF & CSV exports
- ✓ Settlement extraction & invoice matching

Benefits

- ✓ Reduce manual reconciliation
- ✓ Accelerate month-end close
- ✓ Eliminate duplicate systems
- ✓ Improve financial visibility
- ✓ Automate repetitive accounting tasks
- ✓ Keep your team on higher-value work
