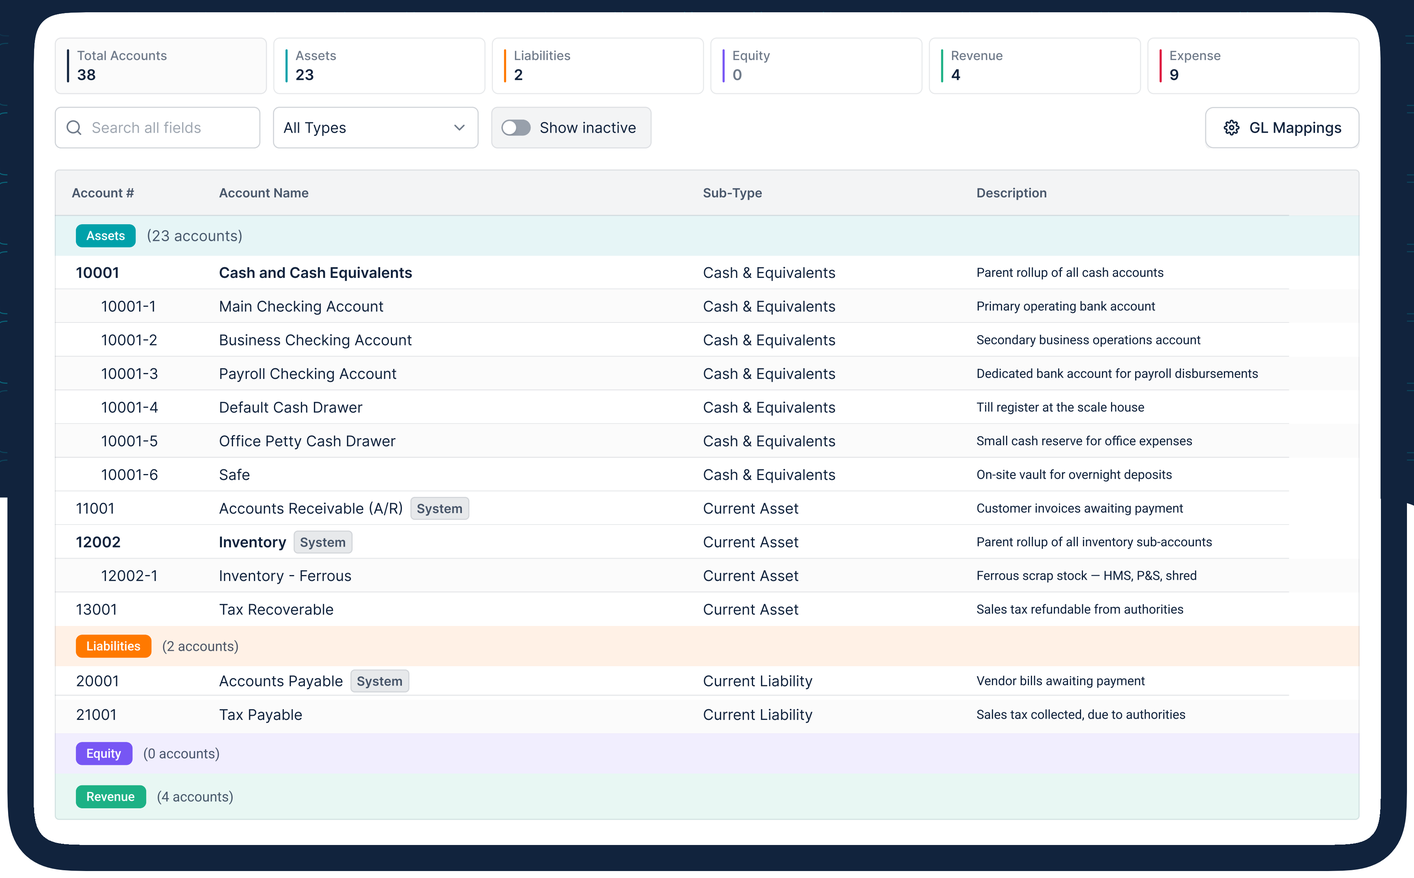
ReSPARK

PRO ADD-ON · INTEGRATED GL

From yard floor to month-end close.



ADD-ON TO YARD OPERATIONS PRO

Natively integrated general ledger.

Every ticket, settlement, invoice, and payment posts to the GL without re-entry. Configurable account mapping, real-time sync logs, and intelligent handling across locked periods.

4x
faster month-end close

$1M+
annualized savings documented

ReSpark Capabilities

Ops → books, automatically

Purchasing, sales, inventory, and payments live in one system. AP/AR teams get intuitive day-to-day workflows; finance leaders gain full visibility, audit trails, and multi-entity control.

Close faster, cleaner

Issues flagged in real time, not month-end. Period locking prevents backdating. Pre-lock review surfaces open items. Straddle support handles in-progress transactions cleanly across locked periods.

Multi-entity built in

Automatic entity attribution, intercompany reconciliation, and consolidated reporting across 15+ countries. Material in transit between locations visible and tracked in real time.

Cash drawer reconciliation

Cash drawers tracked, assigned, and reconciled in-platform — replacing paper end-of-shift reconciliation. Drawer attribution makes the right person accountable.

Trade vs. non-trade

Trade side (revenue, COGS, transportation; AP, AR, inventory, advances, prepayments, credit memos) lives natively. Non-trade flows through Maintenance (work orders, parts, PO approvals, GL-code allocation).

Keep your own GL

Active integrations with QuickBooks, Dynamics, NetSuite, Sage, Oracle, and SAP. The Integrated GL is optional — real-time sync logs work just as well.
