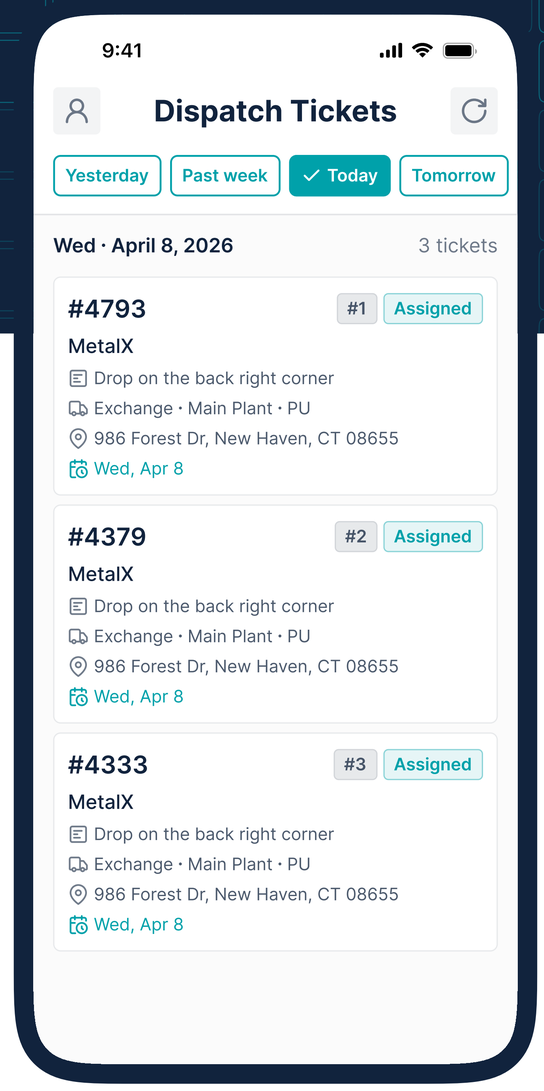
ReSPARK

SALES@RESPARK.COM

Mobile Driver App.

Everything your driver needs in the field — on their phone or tablet, synced in real time to dispatch and the scale.



Overview

ReSpark's mobile driver app puts the right information in your driver's hands and the right data back in your system. Drivers see their assigned trips, follow a guided workflow, capture photos and signatures, and scan containers — all from their phone. Every action syncs to the load board in real time, and when the truck arrives back at the yard, the dispatch-to-scale integration completes the trip automatically.

4 touchpoints
captured per trip — photos, signatures, scans, mileage

Zero paper
documentation attached automatically to every trip record

Guided Trip Workflow

A clear progress bar walks drivers through each step — depart, arrive, service, depart, return — so nothing gets missed and every timestamp is captured.

Real-Time Sync

Every status update, photo, and container scan hits the load board instantly, giving dispatchers live visibility into what is happening in the field.

Documentation Without Paper

Photos of container condition, customer signatures, and mileage records are all captured digitally and attached to the trip record for auditability.

Seamless Scale Handoff

When a pickup trip links to an inbound ticket at the scale, the dispatch trip auto-completes and all driver-captured data carries through to the purchase ticket.

Features

- Mobile dispatch view showing assigned, upcoming, and completed trips
- Step-by-step trip workflow: depart yard → arrive site → service → depart site → return
- Container pickup and drop-off via QR/barcode scan or manual selection
- Photo capture for proof of service and condition documentation
- Electronic signature capture for proof of pickup or delivery
- One-tap directions and customer calling from the trip screen
- GPS-timestamped status updates at each step
- Dispatch-to-scale handoff — trip auto-completes when linked at the scale

Benefits

- Keep drivers moving with a simple, step-by-step mobile workflow
- Capture proof of service — photos, signatures, timestamps — without paper forms
- Eliminate phone calls back to dispatch with self-service trip details and navigation
- Close the loop seamlessly when the driver returns to the yard via scale integration
