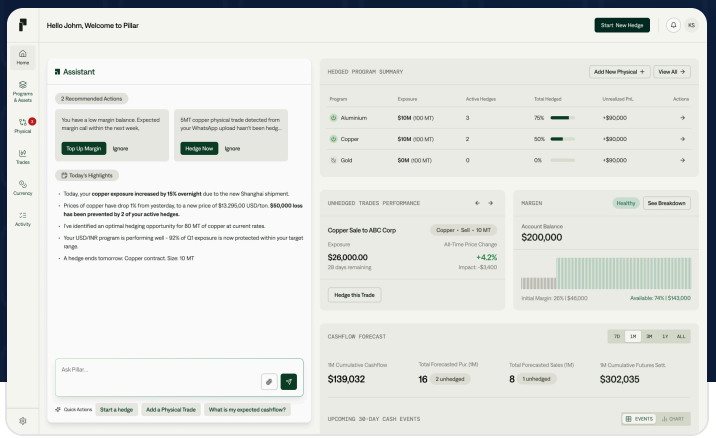
ReSPARK | Pillar

Hedging, built for scrap yards.

Recyclers can carry significant commodity exposure for days, weeks, or even months — and a single market move can erode margins, inventory value, and future cash flow. ReSpark has partnered with Pillar to change that.



An AI assistant surfaces exposure, risk, and your next best hedge — at a glance.

Greater control over commodity risk.

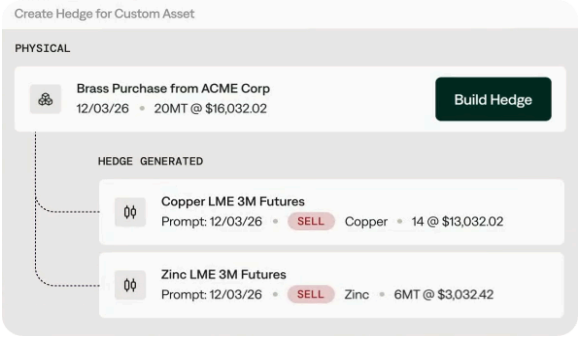
01 **Real-time commodity exposure visibility** across purchasing, processing, and sales.

02 **Transaction-linked hedging strategies** tied to the material you actually move.

03 **Automated execution & position management** — no spreadsheets, no manual tracking.

04 **AI-powered risk analysis** that turns market movement into clear next steps.

05 **24/7 monitoring of open positions** so nothing moves without you knowing.



Auto-generate a hedge from any purchase or contract.

Forecast cashflow across hedged & unhedged positions.

EXCLUSIVE FOR RESPARK CUSTOMERS

Free signup. Free onboarding.

Trading fees waived for 3 months.

As part of this partnership, ReSpark customers get started with Pillar at no cost.
