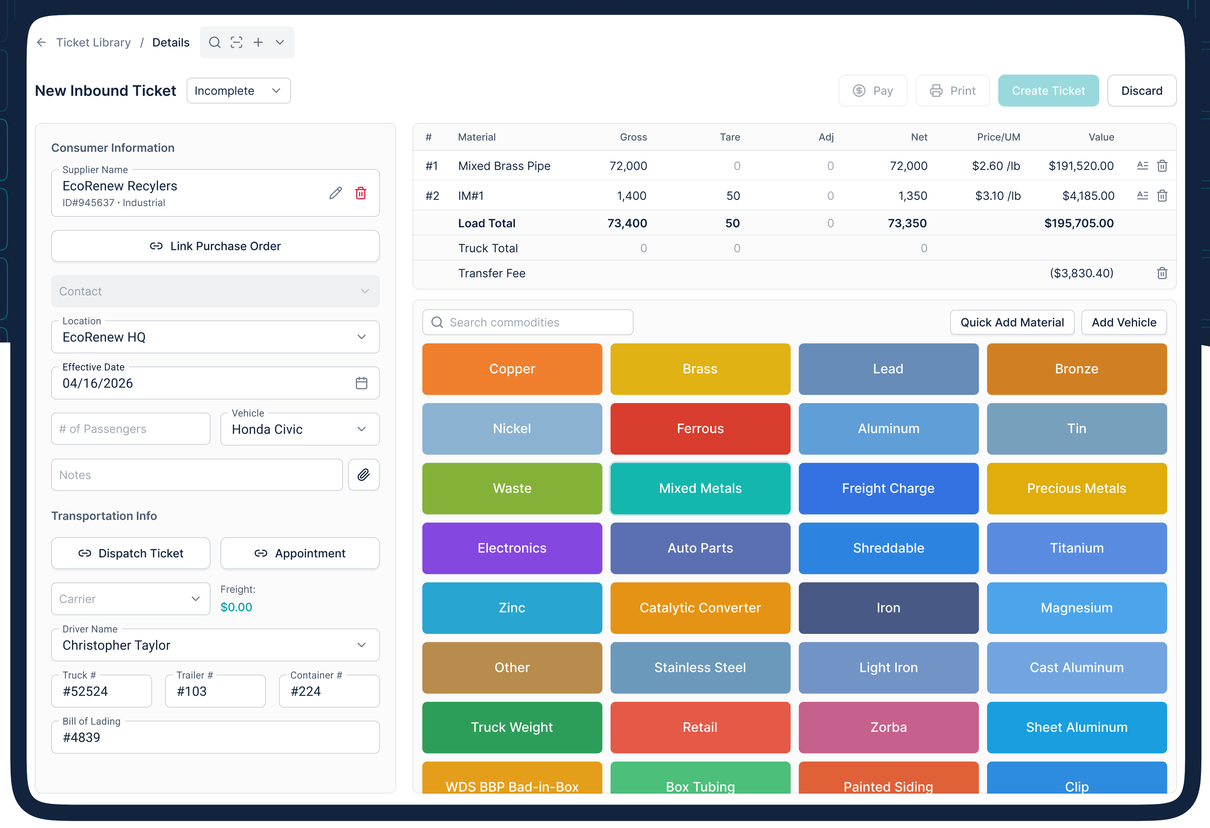
SALES@RESPARK.COM

ReSpark Recycling Software



The most complete platform the scrap industry has ever seen—run your entire operation seamlessly from buying to selling, inventory to dispatch.

Five Products – One Platform

Every capability your operation needs — built to work together.

Yard Operations

Scale tickets, inventory, and dispatch. Automated scale workflows, real-time yard visibility, inbound ticketing, and compliance documentation for single sites and multi-location networks.

AI Agents

Smart automation and insights. Role-based AI agents handle repetitive tasks across dispatch, operations, commercial, and finance so your team focuses on work that matters.

Logistics

Routing, scheduling, and tracking. Optimized load building, route intelligence, driver coordination, and real-time fleet visibility built for how recyclers actually move material.

Finance & Accounting

AP/AR, payments, and reporting. Payment processing, settlement workflows, and financial reporting with a native connected general ledger on the roadmap.

Equipment Maintenance

Track assets and schedule service. Monitor fleet health, schedule preventive maintenance, and reduce downtime across all your equipment and vehicles.

Results that matter

- ✓ 8–14% margin improvement from faster market response
- ✓ 4x faster month-end close with connected finance
- ✓ 31% reduction in inventory turnover time
- ✓ 2x faster dispatch response
- ✓ $150K+ saved on maintenance in a single year

Before ReSpark

- ✗ Operations and finance running in separate systems
- ✗ Data re-entered manually across yard, dispatch, and back office
- ✗ Visibility only at month-end
- ✗ Every gap between systems is a place margin leaks

After ReSpark

- ✓ One connected platform from gate to books
- ✓ Real-time visibility by yard, entity, and customer
- ✓ AI-ready architecture that ships updates weekly

> *ReSpark has simplified our busy scrap world by consolidating 20 programs into one.*
