ReSPARK

ReSparkPM.

Maintenance software built for recyclers.

Reduce downtime, extend asset life, and keep operations running with software purpose-built for the scrap & recycling industry — assets, inspections, work orders, PMs, purchase orders, and parts on one platform.

BUILT FOR YOUR FLEET

- Material Handlers
- Cranes
- Balers
- Shredders
- Shears
- Forklifts
- Trucks
- Trailers
- Mobile Equipment
- Support Assets

WHY IT MATTERS

Equipment is one of the largest investments in your operation. When maintenance lives in spreadsheets, paper, and tribal knowledge, small issues become major failures. ReSpark gives teams the reliability, accountability, and visibility they need across every facility.

SALES@RESPARK.COM

Everything you need to keep equipment running

Asset Management & Lifecycle

Track every asset from acquisition to retirement — service history, warranties, manuals, photos, and records in one place.

Work Orders

Create, assign, prioritize, and complete work orders. Track labor, parts, costs, photos, and technician activity end to end.

Inspections & QR Codes

Standardize inspections across facilities. Scan QR codes, complete digital checklists, and catch issues before failures.

Preventative & Predictive

Reduce reactive work with recurring schedules, automated reminders, and meter-based maintenance programs.

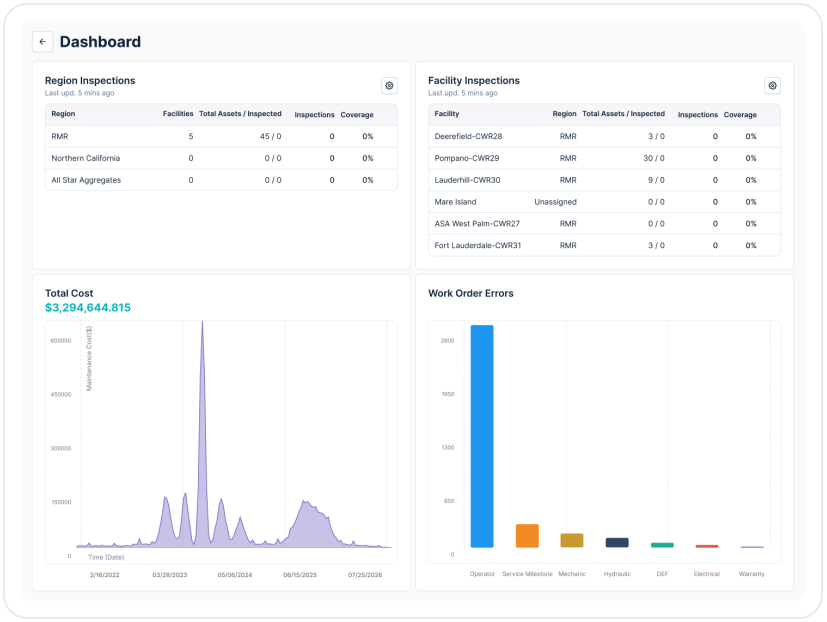
Purchase Orders & Spend

Manage requests, approvals, vendors, and maintenance spend from one platform with full cost visibility.

Parts & Consumables

Track inventory levels, usage history, vendors, and reorder thresholds so techs always have the parts they need.

See it in action



COST & INSPECTION DASHBOARD

The result

- Reduce downtime
- Standardize maintenance processes
- Extend asset life
- Improve accountability
- Increase visibility across facilities
- Reduce maintenance costs
- Make better operational decisions
- Improve equipment availability
