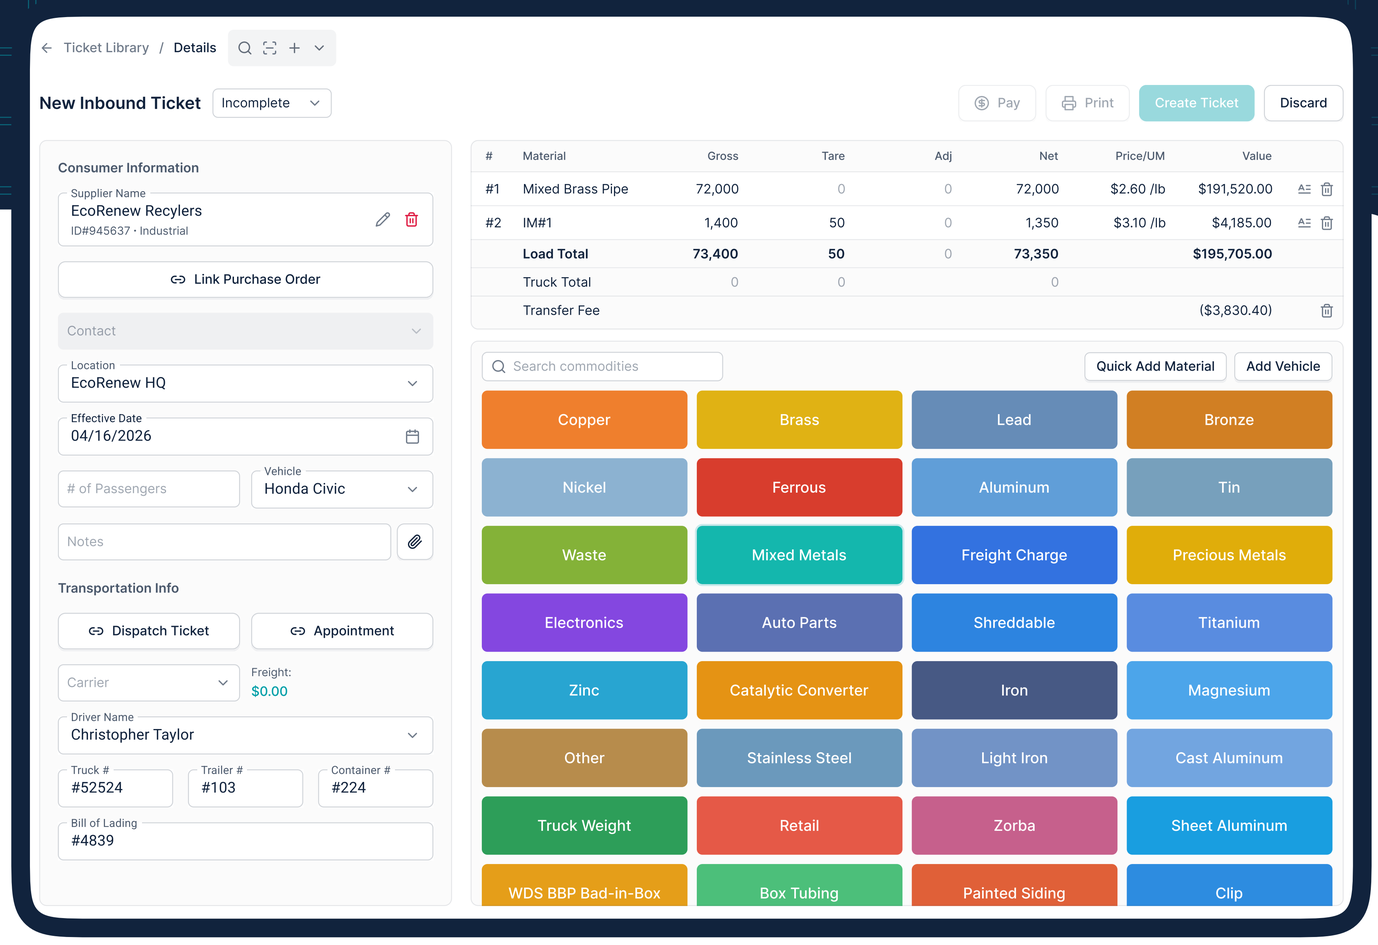
ReSPARK

The scale-house starting line.

YARD OPERATIONS · ESSENTIALS



Entry-level yard ops – the foundation every yard needs

Touchscreen-first ticketing, integrated hardware, a mobile operator app, and in-workflow compliance. The foundation every yard needs before layering on commercial, financial, or logistics modules.

5–10 hrs / week

ReSpark Capabilities

Scale ticketing

Touchscreen-first — every common action reachable without a mouse. Full keyboard-free operation at the kiosk, power-user hotkeys at the desk. Configurable commodity order, color coding, and ticket statuses per yard.

Customer context inline

Purchase history, compliance status, license scans, pricing — all on the ticket. Look up customers by name, ID, phone, or license plate; edit profiles inline without leaving the ticket.

Integrated hardware

Platform and truck scales with automatic weight capture. IP cameras with auto-triggered photo capture during weighing. Ticket and label printers. ID scanners for driver's license and business-ID reads. Self-service kiosks. Signature pads. Bluetooth printing on mobile

Material search & hotkeys

Commodity filters, quick-access favorites, inline deductions by weight, dollar, or percentage with configurable adjustment types. Label formats customizable per yard.

Compliance, built in

Required-field validation. LeadsOnline upload integration. Do-not-buy checks fire during license scanning for retail suppliers. License scans persist on the customer record.

Mobile operator app

Scale tickets, finished-goods tags, and inventory lookups from any phone or tablet. License scanning, QR-code operations on containers and packages, Bluetooth printer support for on-the-go label printing.
