ReSPARK

Your entire operation – one connected platform.

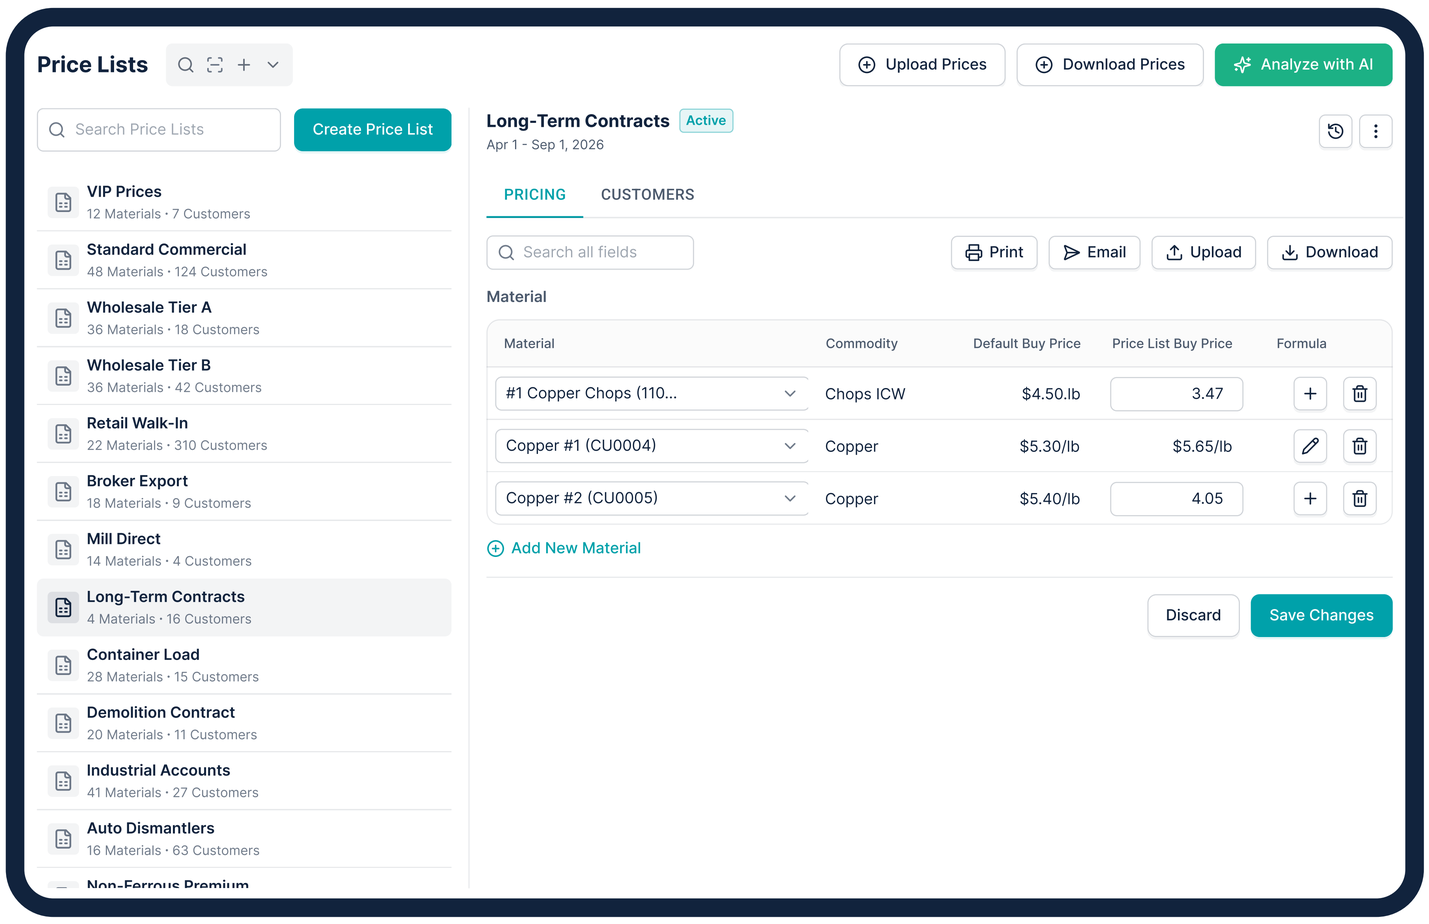
YARD OPERATIONS · PRO

The full platform – buy, sell, price, ship, reconcile.

Everything in Essentials plus the full platform: buy-side and sell-side workflows, commercial pricing and contracts, inventory with reconciliation, intercompany transfers, invoicing and AR, reporting, and the Commercial Intelligence Center.

8–14%
margin improvement

31%
faster inventory turnover



ReSpark Capabilities

Buy-side

PO-anchored purchase tickets with configurable statuses. Supplier profiles hold COIs, certificates, account managers, price-list assignments, and location-specific freight. Auto-generated freight payables when a carrier is added. Batch settlements with check or EFT. Cash netting so negative-value tickets become AR, not negative payables.

Commercial pricing & contracts

Multi-tier price lists with formula-based differentials and market-index references (COMEX, LME, AMM). Price-list versioning with effective/expiration dates. Automated supplier notifications. Auto-archive and renewal workflows. Provisional-price flag on POs.

Sell-side

Sales orders with Incoterms, port of loading/discharge, consignee, and notified party. Appointment calendar with drag-and-drop scheduling. Packing lists reserve and pre-stage finished goods — scan one packing list instead of every box.

Invoicing & AR

One-click invoice from outbound tickets. Structured claims (quality, quantity, weight delivery, wrong material) tied to invoice → ticket → line item. Credit memos linked to originating invoices. Bulk payment processing with partial-payment support. Real-time GL sync with line-item detail.

Inventory reconciliation

Opening → purchases → regrades → ship → adjustments → closing with variance drill-down to every ticket, regrade, and transfer. WIP vs. finished-goods weight segmentation. Inventory turnover in months per material.

Mobile operator app

Scale tickets, finished-goods tags, and inventory lookups from any phone or tablet. License scanning, QR-code operations on containers and packages, Bluetooth printer support for on-the-go label printing.
